Re: Revised Recommendations Regarding the Proposal to Review the Practice of
Scanning License Plates (Senate Document#: 10-11-24)

We have carefully considered the proposal entitled "Proposal to Review the Practice of Scanning License Plates", (Senate Document#: 10-11-24). We have determined that we can make changes to the current system and save data for 90 days instead of 30 days. Upon advisement by the Senate, the department will increase data storage to 90 days.

As a standard practice, The Department of Transportation gives data upon request to the University Police. The Transportation Department does not determine standards of use by the police.
